BCA Industries finalizes distributor agreement for South America at Waste Expo

May 8, 2012 MILWAUKEE WI.

BCA Industries recently agreed to distribute their PD1000 portable shredder units to South America through SOLCO. SOLCO is an established import, finance and logistics company headquartered in Medellin Colombia specializing in the distribution and shipping of virtually any product their customers need brought in to South America. Doug Bartelt President of BCA finalized the documents with Ronald Solich of SOLCO at the Waste Expo show in Las Vegas on May 3rd while Ron was attending to train with the BCA staff. BCA is a “Made in America” manufacturer of reduction and recycle machinery. According to Ron “After extensive research we found the PD1000 is a perfect fit for our customers need for portability and cost effective tire recycling. It really is unique in the marketplace.”

BCA Industries had recently delivered a PD1000 portable shredder unit to Panama with the help of SOLCO. The equipment will be used for tire shredding as well as wood, paper and bio-waste. The PD1000 is the answer where true portability is needed saving time and money by eliminating the need for transportation and handling of waste tires. Ron is currently working on proposals to bring the PD1000 TIF to Colombia for on-site processing of tires to chip. The PD1000 series is the only shredder made in the world that can be pulled by a standard ¾ ton truck without special permits. It will produce TDF chip using an onboard 100 HP generator powering a dual shaft shredder with trommel screen.

Serving the recycling needs of all of South America with flexible and affordable equipment is the hope and intent of the agreement partnering BCA Industries with SOLCO.
